

I am a listener of K-Love radio which is a national broadcast. This station is the dominant station which I listen to. With two boys (10 and 12) it is very important to me to have a station to listen to that I know will be appropriate for them. This is a family friendly station -- there won't be bad language, innuendos, or rude comments. Everything that is broadcast on K-Love radio is uplifting and adds a positive impact on my family every day. If this positive message were not available it would definitely be a drawback for our community as well as our nation as a whole. WE need to preserve and grow each and every means of communication that lifts people up and gives them hope. Our children are bombarded with negatives constantly and there needs to be alternatives to the "sex, drugs, and rock-n-roll" constantly thrown at them. It can only make our community better when we offer them this alternative. Please preserve our ability to receive this national broadcast.
